

The Industrial Process Water Use Reduction Program lowers costs, saves money, and saves water.

Saving water means:

- ◆ Increased water efficiency
- ◆ Lower water and sewer bills
- ◆ Reduced gas and/or electric costs
- ◆ Enhanced production efficiencies.

Cash incentives are available for water saving improvements such as:

- ◆ Installing equipment that captures, treats, and reuses water that is normally discharged to the sewer, and
- ◆ Installing more water efficient equipment within the production process.

What is the Industrial Process Water Use Reduction Program?

The Industrial Process Water Use Reduction Program provides technical assistance and cash incentives to local businesses that invest in water saving process improvements.

The Industrial Program is open to businesses within the Municipal Water District of Orange County's (MWDOC) service area.

Free technical surveys of industrial operations, including process change recommendations, are available to qualified participants.

What are the minimum qualifying criteria?

- ◆ Water-saving improvements must be new,
- ◆ Water-saving improvements must remain operational for at least five (5) years, *and*
- ◆ Project costs must have a minimum (2) two-year simple pay back.

How much is the Reduction Program's cash incentive?

Based on retrofit cost and water savings (monitored for 1 year), qualified participants will receive the lesser of:

- ◆ \$4.37 per 1,000 gallons of water saved, *or*
- ◆ Fifty (50) percent of the total amount of retrofit cost, *or*
- ◆ Buy down of project cost to reduce the simple pay-back period to two (2) years.

How is this cash incentive paid?

- ◆ First payment after verification of equipment installation and startup, *and*
- ◆ Second payment after a one-year monitoring period to measure water savings.

**This is a limited-time-only program.
