Cleaner than some people's drinking water!

But don't drink it...

Why is recycled water important?

Use our clean fresh water two times instead of one.

It is an additional supply

Diversified portfolio of water resources.

Municipal Golf course has been irrigating with RW since the 1970's

Majority of water is imported and expensive.

Use it instead of dispose of it.

What else should we know?

It is still important to use recycled water efficiently, it is limited.

It is illegal for recycled water to run off of your landscape into storm drains.

In San Clemente, all irrigation is prohibited from running off site.

San Clemente's Recycled Water

Expansion of plant will be completed next month.

Will begin connecting customers in September.

In San Clemente, all HOA's that can connect to Recycled Water are required to connect.
