## Metropolitan Water Districts: board of directors membership.

Under the Metropolitan Water District Act, the board of a metropolitan water district is required to consist of at least one representative from each member public agency, as prescribed. The act authorizes each member public agency to appoint additional representatives not exceeding one additional representative for each 5% of the assessed valuation of property taxable for district purposes within the entire district that is within the boundaries of that member public agency.

This bill would instead authorize each member public agency to appoint additional representatives using either the formula based on the valuation of property within the district or a formula based on population within the district, as specified, whichever formula would result in the appointment of more representatives.

SECTION 1. Section 52 of the Metropolitan Water District Act (Chapter 209 of the Statutes of 1969), as amended by Section 2 of Chapter 781 of the Statutes of 1998, is amended to read:

52. (a) (1) In addition to one representative, any member public agency may designate and appoint several representatives not exceeding using the formula described in either subparagraph (A) or (B), whichever would result in the designation and appointment of more representatives.

(A) A member public agency may designate and appoint several representatives, not to exceed one additional representative for each full 5 percent of the assessed valuation of property taxable for district purposes within the entire district that is within such that member public agency, in which event all such representative present at a meeting of the board of directors when a vote is taken shall cast, or may abstain from casting, an equal share of the total vote to which such member public agency is entitled, agency.

~~(b) This section shall become operative on January 1, 2001.~~

(B) A member public agency may designate and appoint several representatives, not to exceed one additional representative for each full 5 percent of the population within the entire district that is within that member public agency. The district shall calculate the number of additional representatives under this paragraph using information provided by the Department of Finance and other pertinent population data.

(2) If additional representatives are designated and appointed pursuant to subparagraph (B) of paragraph (1), that number shall be recalculated once every 10 years, in the year immediately following a United States Census.

(b) At a board of directors meeting where a vote is taken, all representatives present at the meeting shall cast, or may abstain from casting, an equal share of the total vote to which the member public agency is entitled.
