

MWDOC On-Call Technical Services RFQ Responses
March 15, 2021

1. If a respondent chooses to submit for only one or two areas of expertise, does that impact the response ranking relative to firms who submit on all areas? Respondents will be ranked in individual areas of expertise. There is no expectation of multiple area submissions.
2. Section 3 Firm's expertise – does not include a page limit, what is the expected maximum number of pages for this section? A page limitation was not included for Section 3 because many respondents wish to use graphics/organizational charts to describe key personnel and teams. MWDOC encourages the use of charts and graphics with short text explanations over text only descriptions for this section.
3. Under Item 2.2 – Required Response Items, Section 5, page limitation - The number of pages allowed is increased from one to three in order to address the Evaluation Criteria "Approach to addressing and completing the tasks to be assigned on an as-needed basis".
4. Under Item 2.2 – Required Response Items, Section 7, page limitation - If responding to multiple areas of expertise then the page limit can be increased to three pages per area of expertise submitted.
5. Under Item 2.2 – Section 3: Description of Firm(s) – 2nd sentence revise typo to read:
"Respondents can submit qualifications for one area of focus or multiple areas (Bay Delta Area Water and Environmental Management, Engineering & Resource Development [Engineering], Water Reliability Planning)."
