#### PUBLIC HEARING

#### HOLD PUBLIC HEARING REGARDING ADJUSTMENT OF MWDOC DIVISION BOUNDARIES PURSUANT TO ELECTIONS CODE FOLLOWING 2020 CENSUS

Mr. Rob Hunter and Mrs. Charles Busslinger reported that review of the District's Division boundaries are under consideration at this time and that the Center for Demographic Research (CDR) has been engaged by MWDOC to review 2020 census data to determine where adjustments are needed. This is legally required every 10 years. Ms. Deborah Diep from CDR provided a presentation (included in the packet materials) reviewing legal requirements that need to be adhered to when considering redistricting from census data, and include consideration of population data by age, race and ethnicity. Ms. Diep reviewed several charts and graphs illustrating population growth, by Division, from the 2020 census data over 2010 data. Ms. Diep also reviewed specific redistricting criteria and noted that another review by the Board would be held on January 5<sup>th</sup> by MWDOC. Ms. Diep reviewed the data that CDR has gathered, illustrating variances in the census data where adjustments will need to be made due to population growth.

President Tamaribuchi opened the Public Hearing and solicited Public Comments; none were received. He then solicited comments from the Board. Director Seckel inquired whether future growth is an allowable consideration when making adjustments to boundaries with Ms. Diep responding that future growth can be considered. Ms. Diep/CDR will be working with the data to make the legally appropriate boundary adjustments, taking into consideration any projected growth/development areas. It was noted that the District's Administrative Code prohibits employees from attempting to influence changes to the MWDOC division boundaries, except where such activities are expressly required in the course of official duties. In the case of adjustments to division boundaries, legal requirements guide how adjustments can be made.

The Board held discussion on potential equitable boundary adjustments for each Division, noting that additional discussion will be held at the January 5<sup>th</sup> Workshop Board meeting, and that two Public Hearings would be held on January 19, 2022 and February 16, 2022, prior to making the formal boundary line adjustments.

The Board received and filed the comments received, and President Tamaribuchi adjourned the Board meeting at 9:21 a.m.

The Committee meeting resumed at 9:22 a.m., and Director McVicker chaired the A&F Committee portion of the agenda, along with Directors Thomas and Tamaribuchi as voting Committee members.

#### CONSERVATION FRAMEWORK STANDARDS UPDATE

Mr. Joe Berg (Director of Water Use Efficiency) provided a presentation regarding the status of the Conservation Framework Standards.

President Tamaribuchi encouraged Mr. Berg to get together with MWDOC's state advocacy representative Syrus Devers from Best, Best & Krieger to discuss the Conservation Framework Standards and potential and realized impacts on Orange County. He would like to focus on what the issues are, preparation for discussion with the Orange County legislature, and how to inform the public of the possible impacts.

#### ACTION ITEMS

## EXTENSION OF FEDERAL LEGISLATIVE ADVOCACY CONTRACT WITH NATURAL RESOURCE RESULTS (NRR)

Ms. Heather Baez (Governmental Affairs Manager) shared that NRR is completing its first full year providing federal legislative advocacy services to the Municipal Water District of Orange County (MWDOC). This contract was sent out for competitive bid in 2020 for a one-year contract beginning in 2021, with the option to renew annually for four additional years. Approval of this agreement would renew the second year of the contract.

The Committee generally expressed support for renewing the contract with NRR, with Chair Yoo Schneider commenting that the state and federal legislative advocacy programs faced challenges in the past year because the legislative priorities shifted to the COVID-19 pandemic. She went on to say that she appreciated the level of detail and work NRR has done to date and looks forward to building upon that in the next year.

Upon MOTION by Director Seckel, seconded by Director Nederhood, and carried (3-0), the Committee recommended the Board of Directors renew NRR's contract for one additional year. A roll call vote was taken, with Directors Yoo Schneider, Seckel, and Nederhood voting in favor. This item will be presented to the Board on December 8, 2021.

## EXTENSION OF STATE LEGISLATIVE ADVOCACY CONTRACT WITH BEST, BEST & KRIEGER (BB&K)

Heather Baez (Governmental Affairs Manager) stated BB&K has provided state legislative advocacy services to the Municipal Water District of Orange County since 2016. This contract was most recently sent out for competitive bid in 2020 for a one-year contract beginning in 2021, with the option to renew annually for four additional years. Approval of this agreement would renew the second year of the contract.

Upon MOTION by Director Seckel, seconded by Director Nederhood, and carried (3-0), the Committee recommends the Board of Directors renew BB&K's contract for one additional

year. A roll call vote was taken, with Directors Yoo Schneider, Seckel, and Nederhood voting in favor. This item will be presented to the Board on December 8, 2021.

### **OC-70 BILLING METER ERROR RESOLUTION**

Charles Busslinger (Director of Engineering) explained that this issue has been on-going for quite some time and MWDOC staff has been working with both MET and East Orange County Water District (EOCWD) on an investigation as to the accuracy of the billing (venturi) meter at Service Connection OC-70. The investigation determined the magnitude of the metering error and provided a resolution to correct the error but was unsuccessful in determining a specific cause(s).

He advised that MET maintains that the MET Administrative Code Section 4506 applies in this circumstance (which provides no more than six months of reimbursement before the date of notification of a possible error to MET). MET recognizes that MWDOC strongly disputes this position and MWDOC has argued that the three-year term prior to the date of notification provided in MET Administrative Code Section 4507(h) should apply. Mr. David Youngblood, General Manager from the East Orange County Water District, stated he agreed with the three year term, prior to the date of notification resolution as 'the best deal we can get'.

Mr. Rob Hunter (MWDOC General Manager) advised that pursuant to his conversation with MET's Assistant General Manager/Chief Administrative Officer, Shane Chapman, Mr. Chapman confirmed that this proposed resolution addresses past metering issues and does not limit any future issues with the (venturi) meter at Service Connection OC-70.

Responding to Director Seckel's inquiring, Mr. Busslinger stated that the other operational issues noted in the packet are still being worked on with MET and ETWD and are not part of the resolution stated above.

Upon MOTION by Director Seckel, seconded by Director Nederhood, and carried (3-0), the Committee recommended the Board of Directors authorize the General Manager to:

- 1. Enter into an agreement with MET for reimbursement of overbilling of water deliveries at OC-70 for the period of January 5, 2012, through September 15, 2021, under MET Administrative Code [Section 4507(h)], and;
- 2. Enter into an agreement with East Orange County Water District (EOCWD) to reimburse EOCWD for overbilling for the same period under MWDOC Administrative Code Section 4002 - Discovery of Mistakes or Errors, as the full and final resolution of all claims to date regarding the accuracy of the OC-70 meter.

A roll call vote was taken, with Directors Yoo Schneider, Seckel, and Nederhood voting in favor. This item will be presented to the Board on December 8, 2021.

#### ADOPT RESOLUTION SUPPORTING PFAS LEGISLATION TO PROTECT RATEPAYERS AND WATER/WASTEWATER AGENCIES

Responding to a question by General Manager Hunter, Governmental Affairs Manager. Heather Baez advised that MWDOC's Washington D.C. lobbyist Natural Resource Results (NRR) suggested that sending a letter would be more effective than a resolution, as they are legislation specific.

Upon MOTION by Director Seckel, seconded by Director Nederhood, and carried (3-0), the Committee recommended the Board authorize sending a letter supporting federal legislation that protects ratepayers and water/wastewater providers from costly groundwater cleanup.

A roll call vote was taken, with Directors Yoo Schneider, Seckel, and Nederhood voting in favor. This item will be presented to the Board on December 8, 2021.

Considerable discussion ensued with respect to cost implications, MET's position, impacts to the public (and the need to educate the public). The Committee then requested an update on the Conservation Framework at the next meeting. Director Tamaribuchi asked for confirmation relative to the .65 evapotranspiration factor, and Director Nederhood suggested the Public Affairs Department develop a tactical plan for approaching/educating such groups as OCBC, ACC-OC, etc. on the impacts to the community (and present the plan to the Committee in January or February).

The \$13,864 difference between the book value and the market value on November 30, 2021 represents the exchange difference if all investments had been liquidated on that date. Since it is the District's practice to "buy and hold" investments until maturity, the market values are a point of reference, not an indication of actual loss or gain. There are no current plans or cash flow requirements identified in the near future that would require the sale of these securities prior to maturity.

### CONSENT CALENDAR ITEM January 19, 2022

### TO: Board of Directors

FROM: Joe Byrne, General Counsel

### SUBJECT: APPROVE CONTINUATION OF REMOTE MEETINGS PURSUANT TO AB 361 AND MAKE REQUIRED FINDINGS

### **STAFF RECOMMENDATION**

That the Board of Directors vote to continue virtual meetings pursuant to AB 361 for an additional 30 days based on the findings that (1) it has reconsidered the circumstances of the state of emergency for COVID-19, and (2) state and local officials continue to impose or recommend measures to promote social distancing.

### **COMMITTEE RECOMMENDATION**

This item was not presented to a Committee.

### SUMMARY

At the October 4, 2021 Board meeting, pursuant to AB 361, the Board of Directors adopted Resolution No. 2115 and authorized the Board to continue to have remote meetings based upon the continued state of emergency for COVID-19 and the finding that state and local officials have imposed or recommended measures to promote social distancing. At the past several meetings, including the January 5, 2022 Board meeting, the Board voted to continue such remote meetings for additional 30 day periods. As previously indicated, if the Board wishes to continue to hold remote meetings pursuant to AB 361, and assuming a state of emergency still is in place, it must make similar findings within every 30 days.

At the time this report was prepared, there is a continued state of emergency for COVID-19 and state and local officials continue to recommend measures to promote social distancing. This item is on the Agenda for the Board to consider whether to continue remote meetings pursuant to AB 361 for an additional 30 days and to make the appropriate findings.

### SUBJECT: Authorization to Contract with Customer Meter Accuracy Testing Companies

### STAFF RECOMMENDATION

Staff recommends the Board of Directors authorize the General Manager to enter into fiveyear contracts with McCall's Meters, Inc. and Westerly Meter Service Company to provide meter accuracy testing services to retail water agencies throughout Orange County as part of MWDOC's Water Loss Control Shared Services Program.

### COMMITTEE RECOMMENDATION

Committee concurred with staff recommendation.

### SUMMARY

In December 2018, the Board adopted the Water Loss Control Shared Services Business Plan and authorized staff to begin offering a variety of shared services to water agencies throughout Orange County. Staff has completed a request for proposals process that identified two companies that provide volumetric customer water meter accuracy testing services.

### DETAILED REPORT

The Water Loss Control Shared Services Business Plan includes meter accuracy testing as one of the services available to participating retail agencies. Customer water meter test

results inform the assessment of customer metering inaccuracies within the American Water Works Association (AWWA) Water Audit (M36), the quantification of Apparent Losses, and Apparent Loss management program design. Meter accuracy test results will more clearly delineate the volumes of real losses from apparent losses and allow the retailer to take more informed and strategic actions to minimize these losses.

Water Systems Optimization (WSO) will assist agencies in establishing a random representative sample of meters to be tested. The representative sample will include the age, manufacturer, model, and throughput of water in the sales meter population. The targeted number of sales meters to be tested for each agency ranges from a minimum of 30 meters for a small agency to 0.5% of all sales meters for a large agency. As of 2020, four agencies have participated in the Customer Meter Accuracy Shared Service. A total of 1347 small and large meters have been tested as shown in Tables 1 and 2 below.

### Table 1 Small Meter Testing

City of Orange	170	0	0	0
South Coast	0	47	54	54

Meter testing services encompass small meters (3" and smaller) and large meters (4" and larger). Small meters will be removed and placed on a mobile test bench or transported to a testing facility. Large meters will be tested in-situ. Both small meters and large meters will be tested at a minimum of three flow rates that represent a low flow rate, an intermediate flow rate, and a high flow rate. Small meter flow rates will be drawn from AWWA Manual M6: *Water Meters – Selection, Installation, Testing, and Maintenance.* Small meter tests must be conducted for a duration sufficient to ensure a quantity of throughput that minimizes test uncertainty. Large meter test flow rates will be selected based on each meter's consumption history and flow distribution profile. In the absence of this information, large meter test flow rates will be drawn from Manual M6. Large meter tests will also be conducted for a duration sufficient to ensure a quantity of throughput that minimizes test uncertainty.

MWDOC's role in providing this shared service is to select and contract with meter accuracy testing companies and to coordinate testing services with agencies. Retail agencies accessing these services will pay all costs charged by meter testing contractors, along with an administrative fee to MWDOC for coordination of these services. MWDOC's administrative fee is \$346 per batch of meters tested and provides for staff time for coordination and supervision of meter testing services.

Staff prepared a Request for Proposals (RFP) describing the desired meter accuracy testing services. The RFP was released on December 1, 2021 and required proposals to be submitted by December 15, 2021. Staff received two proposals by the deadline. Both contractors offered common pricing structure, which are summarized in Table 3. Both contractors have provided customer meter accuracy testing services to retailers through the MWDOC Shared Services Program for the past 5 years. They have each provided reliable and accurate service and maintained positive working relationships with retail staff. For these reasons, the Staff concluded that both contractors are well qualified to provide meter testing services.

(1) Fixed rate of \$60 for non-turbine meters and \$65 for turbine meters.

(2) Requires a minimum of 4 meters per day; If less than 4 tests, a portal to portal fee of \$125 will be charged.

Staff recommends the Board of Directors authorize the General Manager to enter into fiveyear contracts with McCall's Meters, Inc. and Westerly Meter Service Company to provide Customer Meter Accuracy Testing Services to retail water agencies throughout Orange County. Contracting with two companies will give agencies a choice of contractors for meter accuracy testing services and will maximize the availability of meter accuracy testing services. Because staff does not have a firm count of meters to be tested over the next five years a "not to exceed" amount is not included in the proposed Board authorization. Rather, staff is requesting authorization for a term of five-years for these services which is consistent with the contracting requirements contained in the District's Administrative Code.

### **BOARD OPTIONS**

### Option #1

 Staff recommends the Board of Directors authorize the General Manager to enter into five-year contracts with McCall's Meters, Inc. and Westerly Meter Service Company to provide Customer Meter Accuracy Testing Services to retail water agencies throughout Orange County as part of MWDOC's Water Loss Control Shared Services.

### Fiscal Impact: None

**Business Analysis:** This recommendation is consistent with the Water Loss Control Shared Services Business Plan adopted by the Board in December 2018.

### Option #2

 Do not facilitate Customer Meter Accuracy Testing Services for retail agencies.
 Fiscal Impact: Will require agencies to invest considerable staff time to conduct Request for Proposals processes to hire meter accuracy testing contractors.
 Business Analysis: This recommendation is not consistent with the Water Loss Control Shared Services Business Plan adopted by the Board in December 2018.

ACTION ITEM January 19, 2022

TO: Board of Directors

FROM: Planning & Operations Committee (Directors Yoo Schneider, Nederhood, Seckel)

Robert Hunter, General Manager Staff Contact: Vicki Osborn

SUBJECT: Approval of Resolution Designating Authorized Agents for FY20 Grant Transfer Agreements for Homeland Security Grants and Execution of Transfer Agreement

# STAFF RECOMMENDATION

Staff recommends that the Board of Directors that the Board of Directors approve the execution of the 2020 Grant Transfer Agreement with the City of Anaheim as the Local Urban Area Security Initiative (UASI) Administrator, and adopt the Resolution providing authority to the WEROC Director of Emergency Management and the General Manager as designated Authorized Agents for FY 2020 Homeland Security Grants the ability to execute any subsequent agreements related to the Homeland Security Grants. Staff will come back to the Board for a purchase award in the event the award is greater than \$25,000.

## **COMMITTEE RECOMMENDATION**

Committee concurred with staff recommendation.

### SUMMARY

In Orange County, all UASI funds are administered through either Santa Ana or Anaheim as part of the Anaheim/Santa Ana Urban Area (ASAUA) and additional Homeland Security Grants are administered by the County of Orange. The Municipal Water District of Orange County (MWDOC) and the Water Emergency Response Organization of Orange County (WEROC) has been awarded 2010 Homeland Security Grants Funds for use in training

costs and may be awarded additional monies for regional projects. More information will provided about these projects in a future staff report as warranted.

In order to receive 2020 UASI grant funds and future Homeland Security Grant funds, the District must designate by resolution at least one authorized agent for this grant. Staff recommends that the board approve two authorized agents by title – the General Manager and the WEROC Director of Emergency Management. The recommendation to designate two authorized agents by title is to allow the greatest flexibility in the grant funding management.

The Board has taken similar action in regards to Homeland Security Funds and Urban Areas Security Initiative (UASI) funds. Attached is the 2020 UASI grant agreement. Additionally, attached is a resolution approving the authorized agents. By signing this agreement, the district would also be eligible for other grants opportunities throughout the 2020 UASI Grant cycle, should a project present itself as a good opportunity that may meet national homeland security goals.

Since 2006, WEROC has obtained \$1,047,294.00 in grants finding to support projects and training.

WEROC remains active with the UASI group and seeks funding when there is discretionary funds available to the Operational Area.

<b>ENGINEERING &amp; PLANNING</b>		
East Orange County Feeder No. 2 (EOCF#2) Emergency Pilot Program	Staff and Means Consulting continue to work with Metropolitan (MET) on defining and phasing a scope of work for emergency pump-in of local water supplies into EOCF #2 under MET Admin Code 4519: Emergency Deliveries of Member Agency Water Supplies in Metropolitan's System. The program is intended to enhance water supply reliability in a prolonged emergency. As indicated previously, this is a multi-year effort. The intended outcome of this effort is a set of guidelines for MET member agencies to use to establish their emergency pump-in programs to MET's system. Hazen & Sawyer is also providing technical assistance for this effort.	
Economic Benefit Studies and Modeling Work to Quantify the Benefits of Local Projects in the Context of MET's 2020 Integrated	MWDOC staff continues working with the Brattle Group and CDM Smith on the Economic Benefits Studies. The studies will be useful in helping MWDOC and our agencies better understand the reliability benefits provided by potential supply investments at both the MET level and at the Orange County level by quantifying their economic benefits. The studies are looking at two main sectors of the economy: Residential and Business sectors. The benefits are being quantified by looking at the 'avoided costs' of water shortages to both of these sectors of the economy.	
2020 Integrated Resources Plan (IRP)	Wallace Walrod, the economist for Orange County Business Council and sub-consultant for the Brattle Group, is leading the business portion of the economic benefit studies and is surveying the business community to determine how they might be impacted by both emergency water shortages (i.e., earthquakes) which are severe shorter-term shortages; and by longer-term and less severe shortages (i.e., droughts).	
	Cal State University, Fullerton's Social Science Research Center (CSUF) has completed surveys of over 400 Orange County businesses. Dr. Walrod and Dr. Boarnet are currently analyzing the data and preparing a report. A presentation of business survey results is anticipated at P&O Committee once the data has been analyzed.	
	The residential impact analysis is being conducted by David Sunding of the Brattle Group, using available residential information.	
Reliability Study Update	Staff is working with CDM Smith on an update to the reliability study. The update will look at a total of 5 scenarios that include recent information, including uncertainty about the Delta Conveyance Project and more recent Climate Change impact information. The update will incorporate the latest demand forecasts from the 2020 Urban Water Management Planning efforts, update project cost information, and include updated information from MET's 2020 IRP process. Staff participated in a meeting with MET staff and CDM Smith on September 25, 2021, to discuss supply projections for the State Water Project and the Colorado River Aqueduct related to the reliability study update.	
	Staff anticipates the update to be completed in early 2022. Staff will then bring the study results to the Board for discussion.	
Doheny Ocean Desalination Project	South Coast Water District (SCWD) continues to develop the Doheny Ocean Desalination Project. SCWD is currently working through multiple due diligence items to move the project forward, including; permitting, plant sizing and siting, financing, and project delivery method. SCWD anticipates having all necessary permits by the end of the 1st Quarter of 2022 and estimates an online date of early 2026 if approved by the SCWD Board.	

Doheny Ocean Desalination Project – continued	On July 22, 2021, SCWD conducted its 7 <sup>th</sup> workshop on the SCWD Integrated Water Resources Plan (IWRP). Included in that plan was considering a strategy for various options for the Doheny Ocean Desalination Project. The SCWD Board approved an adaptive management strategy which includes proceeding with efforts to secure partners for a 5 MGD Doheny Ocean Desalination Project. If SCWD is unsuccessful in securing partners, SCWD will proceed with constructing a smaller 2 MGD project that does not have future expansion capabilities. SCWD held a Special Board Meeting on September 2, 2021, to discuss the financial implications of the project. Clean Energy Capital (CEC) presented a water cost analysis for the project where CEC presented cost projections for a 2 MGD project with an estimated 1 <sup>st</sup> -year water cost of \$1,928/AF in 2021\$, and a 5 MGD project with an estimated 1 <sup>st</sup> -year water cost of \$1,479/AF in 2021\$. The SCWD Board actions included accepting the water cost analysis; initiating a Public Outreach Program supporting the implementation of the project; re-engaging with task-related consultants for the development of necessary contract activities; and authorizing the SCWD General Manager to develop a partnership education plan to pursue and secure partnerships with local agencies to realize the cost savings a 5 MGD project provides. SCWD anticipates an update on the third-party hydrogeology study of the San Juan Basin in January 2022.
Poseidon Resources Huntington Beach Ocean Desalination Project	On April 29, 2021, the Santa Ana Regional Water Quality Control Board (SARWQCB) conditionally renewed Poseidon's permit governing the seawater intake and waste discharges. The SARWQCB order requires Poseidon to minimize negative impacts on marine life by directing them to undertake a series of mitigation measures and prohibiting the intake of seawater and the discharge of concentrated brine until certain conditions are met. The next step for Poseidon includes seeking permits from the California Coastal Commission (CCC), which is anticipated to occur during the first quarter of 2022.
Shutdowns	<ul> <li>Diemer Water Treatment Plant</li> <li>MET plans to repair a chlorine diffuser pipe at the Diemer WTP, which requires a sevenday full-plant shutdown. Shutdown dates are being evaluated by MET staff at this time.</li> <li>Orange County Feeder</li> <li>MET is planning to reline and replace valves in a section of the Orange County Feeder from Bristol Ave to Corona Del Mar – this is the last section of this 80-year-old pipeline to be lined.</li> <li>MET has delayed the relining project and has proposed new shutdown dates of September 15, 2022, through June 15, 2023.</li> <li>Orange County Feeder Extension</li> <li>MET plans to reline 300-linear feet of the OC Feeder extension affecting the City of Newport Beach, IRWD, and LBCWD. MWDOC and the City are meeting with MET staff to review the Traffic Control Plan details.</li> <li>MET has delayed the relining project by one year and has proposed new shutdown dates of June 16, 2023, through July 10, 2023.</li> </ul>

	MET is planning rehabilitation work on Lake Mathews' facilities from March 14, 2022, through March 23, 2022. Work on Lake Mathews will affect untreated downstream lines. During the shutdown, the following agencies will be affected: OCWD, YLWD, Serrano WD, IRWD, TCWD, ETWD, SMWD, MNWD, and the City of San Clemente.		
	Allen-McColloch Pipeline		
	MET has completed 50% of the preliminary design of the AMP PCCP rehabilitation and is expected to be complete with the design by 2023. Preliminary design work currently underway includes identifying priority reaches, developing access locations, conducting geotechnical assessments, modeling a surge analysis, conducting real property assessments, identifying permitting requirements, and developing a feeder isolation plan. A draft project schedule will be developed at the completion of the preliminary design. Rehabilitation of individual reaches will be based on the ongoing condition assessments, priorities, and shutdown scheduling.		
	The first working group meeting with the impacted AMP agencies and MET was held on September 28, 2021. MET presented several options in their construction approach to completing the relining of the AMP. Each option includes multiple shutdowns with varying lengths and costs, as shown in the graphic below.

continued	Demand Management Cost Recovery Method Adopted		
	On November 23, the Metropolitan Board directed staff to incorporate the 100 percent Supply Alternative as the demand management cost recovery method used in the proposals for rates and charges. The future proposed rates and charges will recover the revenue requirement set forth by the General Manager and adopted by the Board in the future Biennial Budgets. This will also enable Metropolitan to provide funding for ongoing and future demand management programs.		
	The adopted 100 percent Supply Alternative functionalizes all demand management costs to the supply function. Under this cost recovery method, member agencies that purchase water incur all the costs of demand management, with no cost recovery from current wheeling or exchange transactions.		
	MWDOC's position supported a Demand Management funding mechanism that could bring resolution to this prolonged process (recapped below). Therefore, MWDOC supported the 100% Supply variable rate alternative because it is imperative to have a full-service cost recovery rate in place no later than January 1, 2023.		
	MWDOC's priority throughout this rate refinement process has been steadfast toward a new demand management rate that is fair, equitable, and legally defensible. With the September 21, 2021, Appellate Court opinion, of the remaining rate alternatives, the 100% Supply variable rate most appropriately aligned most with the Board reviewed Rate Refinement Structure Guiding Principles - it is easily applied within Metropolitan's rate structure and impacts nearly all agencies equally.		
	Recap of Actions and Activities		
	Since the unbundling of its rate structure in 2001, which was implemented in January 2003, Metropolitan allocated demand management costs to the transportation operational functions. The functionalization of the costs was supported by the 1996 Integrated Resources Plan's (IRP) 25-year capital and resource planning, which expired this year. SDCWA challenged that allocation in court beginning in June 2010, alleging the Water Stewardship Rate could not be collected as part of Metropolitan Exchange Agreement. On June 21, 2017, the Court of Appeal entered a decision in <i>SDCWA v. Metropolitan</i> , 12 Cal. App. 5th 1124. The appellate court ruled Metropolitan may collect State Water Project transportation costs as part of Metropolitan's System Access Rate and System Power Rate in the wheeling rate and the Exchange Agreement price. However, the appellate court found the administrative record before it for the rates in calendar years (CYs) 2011 through 2014 did not support Metropolitan's inclusion of the Water Stewardship Rate in the wheeling rate or the transportation rates charged under the Exchange Agreement, but the opinion did not address the allocation in subsequent years based on a different record.		
	In April 2018, the Metropolitan Board directed staff to undertake a process with input from member agencies to study and determine the most appropriate allocation of demand management costs based on the review of all available information. The cost allocation study was undertaken by the Metropolitan staff in two phases. The first phase determined an appropriate functional assignment of Metropolitan's demand management costs. Mr. Peter Mayer, P.E., principal at Water DM, made presentations to the F&I Committee and		

MET Finance and Rate Issues – continued	the member agency managers and provided a report entitled "Report on Functional Assignment of Metropolitan's Demand Management Costs" to the Board in August 2019.
	In the second phase, consideration was given to incorporating the functionalization recommendations into Metropolitan's cost-of-service process to recover demand management costs through the existing rate structure or the development of a new rate and/or charge. Mr. Rick Giardina, Senior Vice President at Raftelis, a public utility and public agency management consulting firm, provided presentations to the F&I Committee and member agency managers and a report entitled "Demand Management Cost Recovery Alternatives." However, the Board did not come to a consensus on a cost-recovery method for demand management, and it directed Metropolitan staff on the manner of temporarily funding demand management costs. At the same time, member agency representatives further evaluated the options.
	In December 2019, the Metropolitan Board directed staff: (1) to incorporate the use of the 2019/20 fiscal-year-end balance of the Water Stewardship Fund to fund all demand management costs in the proposed FYs 2020/21 and 2021/22 Biennial Budget; and (2) to not include the Water Stewardship Rate, or any other rates or charges to recover demand management costs, with the proposed rates and charges for CYs 2021 and 2022. Since then, the member agencies have participated in a rate refinement process in which they prioritized the review of alternatives for demand management cost recovery. In September 2021, Metropolitan staff presented to the F&I Committee the Demand Management Cost Recovery Alternatives being discussed by the rate refinement workgroup.
	On September 21, 2021, the Court of Appeal issued a new appellate decision in which it interpreted its 2017 appellate decision. The Court of Appeal clarified that its 2017 decision regarding the Water Stewardship Rate was not limited to 2011-2014 and that it prohibits the inclusion of the Water Stewardship Rate in transportation rates charged under Metropolitan's wheeling rate and in the price term of the SDCWA-Metropolitan Exchange Agreement from 2015 forward. Accordingly, the Metropolitan staff removed all Demand Management Cost Recovery Alternatives that include transportation rate elements for the Board Workshop on November 8, 2021. The rate refinement workgroup met to discuss the remaining alternatives on November 18, 2021. At the meeting, member agency staff recommended presenting the 100 percent Supply Alternative to the Board for its consideration.
MET Integrated Resources Plan Update	At the November 23 Integrated Resources Plan Special Committee, Metropolitan staff presented and discussed key draft findings from the Integrated Resources Plan (IRP) Needs Assessment Phase and introduced the approach for the Implementation Phase.
	The IRP Needs Assessment Phase considered the drivers, scenarios, gap analysis, and reliability assessment to determine the observations and findings. Insights were gathered through collaboration with the member agencies, other stakeholders, expert consultants, and modeling analysis performed over the last two years to develop findings within seven focused areas.
	Focus Area 1: <u>Reliability</u>
	The goal of Metropolitan's investments is to avoid retail water shortages and mandatory end-use cutbacks.

MET Integrated	Tolerance for voluntary conservation varies among member agencies.
Resources Plan Update – continued	Southern California embraces conservation as a way of life – separate and apart from mandatory cutbacks.
	Regional success is for every Southern California consumer and business to have access to affordable, high-quality water.
	Focus Area 2: <u>SWP Dependent Areas</u>
	Portions of Metropolitan's service area are more susceptible to reductions in SWP supplies.
	<ul> <li>This is a risk to the region's reliability. In general, resolving reliability issues for the "SWP Dependent Areas" addresses the larger reliability issues for the entire region.</li> <li>The IRP Needs Assessment found that whenever shortages occur, they involve the "SWP Dependent Areas."</li> </ul>
	Areas to investigate in the IRP Implementation Phase to resolve the "SWP Dependent Area" reliability challenges <i>over the long term</i> by:
	<ul> <li>Investments in the distribution system to enhance flexibility</li> <li>Maintaining existing SWP supply reliability</li> <li>Developing new supplies and/or storage accessible to the "SWP Dependent Areas."</li> </ul>
	Metropolitan must resolve "SWP Dependent Area" reliability issues <u>during the SWP's</u> <u>current drought emergency</u> to:
	<ul> <li>Manage and meet "SWP Dependent Area" demands</li> <li>Enhance system flexibility to convey existing supply to the "SWP Dependent Areas."         <ul> <li>Conduct Severe Drought Assessment to address system flexibility</li> <li>Fast-track actions for short-term implementation to address the current drought</li> <li>Longer lead-time actions may be folded into the IRP Implementation Phase</li> </ul> </li> </ul>
	IRP Assessment Captures SWP Risks (multi-year drought) and opportunities (move water to storage)

**Resources Plan** 

## Focus Area 3: Demand Management

Increased demands, whether from growth or per capita use, represent a major risk to reliability.

- Demand management helps to minimize potential growth in demands. ٠
- Baseline conservation programs help every scenario. •
- Conservation program structure and funding should allow for fluctuating surplus/shortage conditions. This should include that are:
  - Scalable and adaptable to changing conditions
  - Consider financial stability of volumetric revenues & changing demands 0

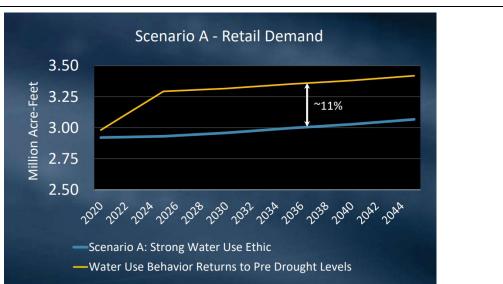

Water use ethic has a significant impact on the region's demands, and the region is at risk if demands are not managed. As illustrated in the chart below, if water use ethic wanes under Scenario A, the retail demand model suggested a 325 TAF increase (roughly 11%) in demands if water use behavior returns to pre-drought levels.

## Focus Area 4: Imported Supply

Imported supplies are susceptible to climate change and regulatory constraints.

- Protecting existing imported supplies avoids the need to invest in new and more • costly replacement supplies.
- Metropolitan leverages imported supplies by storing available water for use when • it is scarce - this is the "Big Gulp, Little Sip" concept. Whereby imported supplies historically provide water for the region's storage portfolio. Reliable imported supplies also maximize regional investments in Metropolitan's storage capabilities.

#### MET Integrated Resources Plan Update – continued

Predominately below-average runoff as a result of both dry and progressively hotter conditions will impact both Sacramento River runoff and Lake Powell's unregulated inflow. Climate change and regulatory impacts will degrade SWP reliability.

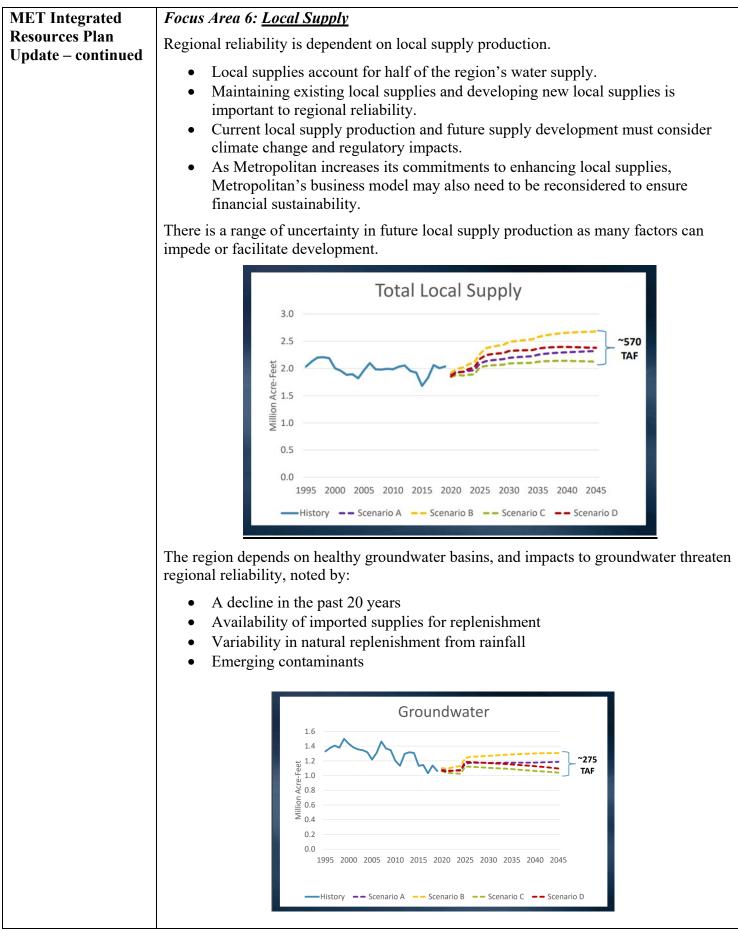

- Scenarios A/B assume gradual climate change and minimal regulatory constraints.
- Scenarios C/D assume severe climate change and higher regulatory constraints.

#### Focus Area 5: <u>Storage</u>

Storage is a proven tool that gives Metropolitan a unique advantage in successfully managing through droughts.

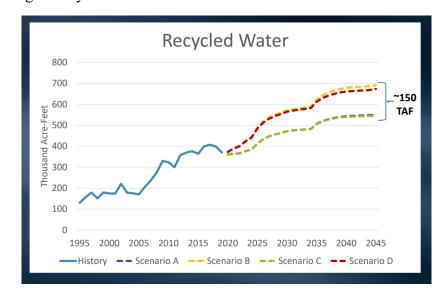

- Investments in storage leverage existing and new supply sources.
- Metropolitan's storage portfolio allows adherence to the "Big Gulp, Little Sip" philosophy.
- Absent action, Metropolitan's storage capabilities will decline over time as contracts expire.
- Metropolitan should develop a new storage capacity accessible to the "SWP Dependent Areas" to help reduce the reliability risk.
- A decrease in shortages can occur if groundwater storage programs return to full use.
- As storage capacity increases, the need for new supply development can be reduced.

IRP Portfolio Category Analysis Summary Table			
Modeled Storage	New Supply Needed by 2045 (TAF)		
(TAF)	Scenario B	Scenario C	Scenario D
0	100	50	650
100	70	15	600
250	30	15	550
500	30	15	500
1,000	Not Modeled	Not Modeled	400

MET Integrated<br/>Resources Plan<br/>Update - continuedFinally, while there has been a success with recycled water development and continued<br/>success maybe going forward due to:• Availability of wastewater effluent reduced by conservation<br/>• Distribution system very costly

• Rising salinity increases costs

## Focus Area 7: <u>Adaptive Management</u>

Reliability is subject to a wide range of uncertainties. Scenario planning broadens the view of reliability to factors beyond historical hydrology.

- Each scenario warrants different sets of actions to ultimately achieve the reliability goal.
- Looking across all scenarios helps reveal robust actions that work well under multiple scenarios.
- Monitoring for indicators (signposts) will inform decision-making on separate sets of action. For example, signposts to inform Demand Management decisions can include monitoring: demographic growth, water use ethic (per capita use), and demand trends.

#### **Implementation Phase**

The Implementation Phase (Phase 2) will begin in 2022 and is expected to take approximately two years. This phase will engage member agencies and stakeholders as the Adaptive Management Plan is developed. Through the Implementation Phase, the Metropolitan Board will select robust actions through specific policy and project identification (with urgent projects expedited).

Colorado River Issues	Colorado River Basin States Coordination Update		
Issues	Representatives of the seven Colorado River Basin States met to discuss the aspects of Drought Contingency Plan implementation that have been triggered by recent 24-Mont Study projections. Potential water supply sources generally would come from the creation of additional system water and ICS. The Southern Nevada Authority Water Authority and Central Arizona Water Conservation District took board action authorizing their general managers to enter into agreements and spend money to implement a 500+ Plan. A related board action item will be brought to the Metropolitan board in December.
Outreach Trip to Imperial Irrigation District and Palo Verde Irrigation District
On November 18, Metropolitan's Chairwoman, several directors, and some staff members traveled to the offices of Imperial Irrigation District and Palo Verde Irrigation District to meet with new directors from those agencies and explore opportunities to expand our existing partnerships. Discussions included options to enhance the local farming communities in those regions and explore opportunities to highlight needs to protect the Salton Sea. Both agencies expressed appreciation for Metropolitan making this trip, and they look forward to furthering the dialogue about options to enhance our partnership with those agricultural communities.
Expanded Partnership with Quechan Tribe
A new seasonal land fallowing program between Metropolitan Water District and the Quechan Tribe of the Fort Yuma Indian Reservation will conserve Colorado River water, making it available to Southern California cities to leave more water in Lake Mead while supporting the Tribe's agricultural economy.
Metropolitan Water District and the Quechan Tribe formalized an agreement for a two- year seasonal fallowing pilot that will pay interested farmers to not grow crops on a portion of their lands between April and July in 2022 and 2023 and make the conserved Colorado River water available for urban needs and help California boost declining water levels in Lake Mead. The agreement will also help meet water conservation targets identified in the 500-plus plan, an effort by Lower Basin water users to add 500,000 acre-feet or more of water to the reservoir over the next two years to reduce the risk of Lake Mead reaching critically low elevations.
The 45,000-acre Quechan tribal lands lie along the Colorado River in southeast California and southwest Arizona. In the spring and summer, farmers typically grow high-value crops (such as vegetables) in the winter, followed by lower-value, water- intensive field crops (such as Sudan grass). Metropolitan will pay up to \$473 per acre fallowed during the spring and summer months, up to \$1.6 million annually, with no more than 1,600 acres left idle. Of the payments made, 75 percent will go to farmers under individual agreements, while 25 percent will be paid to the Quechan Tribe. This agreement builds on an existing water conservation agreement with the Tribe.
Metropolitan estimates an annual water savings of up to about 3,500 acre-feet, enough to serve about 10,600 Southern California households.

Delta Conveyance	<u>Delta Conveyance</u>
Activities and State Water Project Issues	DWR is continuing to develop an Environmental Impact Report (EIR) under the California Environmental Quality Act for the Delta Conveyance Project.
	DWR has identified a range of reasonable alternatives to analyze in the EIR, and current efforts are focused on assessing the alternatives' potential impacts on environmental resources and identifying needed mitigation measures. The U.S. Army Corps of Engineers (USACE) has started the preparation of an Environmental Impact Statement to comply with the National Environmental Policy Act. DWR and USACE are planning to release draft environmental documents for public review in mid-2022.
	Field activities continue to be completed, including cone penetration tests, soil borings, and geophysical surveys, under the Initial Study/Mitigated Negative Declaration for Soil Investigations in the Delta. Field investigations have experienced a short delay because of wet weather, but the current investigations are expected to be complete in November. DWR and the Delta Conveyance Design and Construction Authority (DCA) are continuing work to obtain temporary entry for additional soil surveys on private lands, and DWR is also continuing to pursue permits for soil survey sites that fall under the jurisdiction of the Rivers and Harbors Act (Section 408). Investigations at any given site will not occur until property owners have been notified and required permits and approvals for that site have been obtained.
	DWR held a virtual workshop on November 17 to hear and learn from representatives of several different example community benefits programs around the country. Case study project participants shared firsthand experiences about the development and implementation of their programs, including different organizational structures, development timing, important milestones, and lessons learned.
	Joint Powers Authority
	The regularly scheduled DCA Board of Directors meeting was held on November 18 and included regular staff reports and updates. The DCA's auditors completed their draft Fiscal Year 2020/21 Audit Report and presented findings to the board. The Delta Conveyance Finance Authority (DCFA) also met on November 18 and received an audit of their financial activities for the past fiscal year from Richardson and Company, the DCFA auditor.
	Sites Reservoir
	In October 2021, Congress approved \$80 million in federal funding for Sites Reservoir. The allocation of these funds is tied to the Secretary of Interior's determination in December 2020 that Sites Reservoir is technically and financially feasible and should be prioritized for federal investment. Overall federal funding approved since 2017 totals \$104 million.

Delta Conveyance	Delta Islands
Activities and State Water Project Issues – continued	In October 2021, a kick-off meeting with Delta experts was held as part of the California Department of Fish and Wildlife Planning Grant to conduct an island-wide planning effort that would integrate a mosaic of land use opportunities based on natural characteristics of the island and identified priorities among multiple benefits, including subsidence reversal, sustainable agriculture, carbon sequestration and reduction of greenhouse gas emissions, habitat restoration, improvement of water quality, and economic benefit. This effort, led by Metropolitan staff, is funded by a State Proposition 1 Delta Water Quality and Ecosystem Restoration Grant of \$1.088 million.
	Regulatory Activities
	<b>Delta Stewardship Council</b> The Delta Stewardship Council (Council) kicked off the public outreach process for the Delta Adapts Climate Adaptation Strategy with a Stakeholder Workgroup Meeting on November 16, 2021. The Climate Adaptation Strategy builds on the findings of the Vulnerability Assessment that the Council adopted in June 2021. Metropolitan staff continues to participate and provide input into the Delta Adapts process through the Stakeholder Workgroup and topical focus groups and technical meetings. In November, Metropolitan staff also provided comments in coordination with the State Water Contractors on the Council's Delta Plan Ecosystem Amendment Draft Program EIR.
	<b>State Water Resources Control Board</b> On August 20, the State Water Resources Control Board (State Board) issued curtailments to approximately 4,500 water rights holders in the Delta watershed to help protect drinking water supplies, prevent salinity intrusion and minimize impacts to fisheries and the environment. On October 19, the State Board issued a temporary suspension of curtailments in expectation of substantial precipitation over the following week, particularly in the Sacramento River watershed. The decision to temporarily suspend curtailments was made considering the Water Unavailability Methodology for the Delta Watershed, a range of precipitation forecasts from the California Nevada River Forecast Center, anticipated low water demands in October, the need to refill reservoirs, and existing instream flow requirements. The State Board will continue to closely monitor forecasted precipitation and hydrologic conditions and may re-evaluate curtailment statuses as appropriate.
	Metropolitan staff continued to participate in the collaborative groups called for in the 2019 Biological Opinions for the SWP and Central Valley Project and in the 2020 Incidental Take Permit for Long-term Operation of the SWP to address science needs and inform management and operation of the water projects. In October, staff continued collaboration with state and federal agencies to develop a Juvenile Production Estimate for Spring-run Chinook salmon. After the initial effort to evaluate monitoring alternatives, current efforts are focused on refining the decision problem and objectives.

alternatives, current efforts are focused on refining the decision problem and objectives. Metropolitan staff also continued working with state and federal agencies to develop a monitoring program for steelhead populations within the San Joaquin Basin and/or the San Joaquin River downstream of the confluence with the Stanislaus River. The group is evaluating how long-term monitoring programs for steelhead have been developed in other places.

Delta Conveyance	Science Activities
Activities and State Water Project Issues – continued	A scientific paper recently published in the peer-reviewed journal Ecology & Evolution (https://onlinelibrary.wiley.com/doi/10.1002/ece3.8292) reported on results from a Metropolitan-funded study on statistical approaches for monitoring the distribution of fishes in the Bay-Delta. As background, the information provided by various trawl surveys in the Bay Delta has been used to manage water project operations and impacts on fish species for a half-century. However, some trawl surveys as originally designed do not collect monitoring information that can inform how and why species redistribute across dynamic landscapes in response to natural covariates or management actions. The study investigators, Dr. James Peterson, of Oregon State University, and Dr. Adam Duarte, of the U.S. Forest Service, explore statistical approaches to evaluating trawl survey data and highlight the importance of considering the unique characteristics of monitoring programs when evaluating existing long-term monitoring data to understand the distribution of species.
	Metropolitan staff hosted an onsite tour of the Delta and upper Feather River watershed (Oroville Dam facilities) for General Manager Adel Hagekhalil and Assistant General Managers Dee Zinke and Deven Upadhyay. The tour in the Delta included scientists with the U.S. Geological Survey during which Delta smelt habitat, habitat restoration sites, the drought barrier, and Bouldin Island were highlighted. The Metropolitan staff presented the ongoing floating wetlands pilot research project on Bouldin Island and discussed the next steps.
