

FREE PRESSURE REGULATION & LEAK DETECTION PROGRAM

WHAT IS A PRESSURE REGULATING VALVE (PRV)?

A pressure regulating valve (PRV) is a plumbing device installed on your water line between the street and your home. It is used to moderate high water pressure for optimal home appliance, pipe, and fixture performance, while significantly reducing the likelihood of leaks developing.

PROGRAM BENEFITS

- **FREE** site visit!*
- **FREE** pressure and leak testing
- **FREE** replacement of failed PRVs
- Protect & preserve existing pipes
- Safeguard home appliances
