Through **interactive**, grade-specific sessions, students **investigate** challenges faced by local water providers and **identify** sources of human impact on the **quality, quantity, and availability** of water.

✓ Includes hands-on activities that guide students to solve real-world problems.

Session Topics :

- 💧 **6th-8th Grade:** Students analyze water samples to identify sources of potential pollution and form strategies to monitor or minimize pollution.
- 💧 **9th-12th Grade:** Students collect and analyze data to explore the role of the Sacramento-San Joaquin Delta and its connection to our local water resources.
