Responses to Questions Received on the Request for Proposals (RFP) for Emergency Fuel Supply Delivery and Support Services
Addendum #1

Q1: How many of the listed agencies have their own fuel contracts?

A1. While the exact number is unknown, many member agencies maintain fuel contracts to support their routine day-to-day operations. This regional contract is intended to provide a redundant fuel supply during significant emergencies when an agency's primary fuel vendor is unable to fulfill deliveries, ensuring continued access to fuel for critical operations.

Q2. For those that do, how does this contract affect what they have in place already with their existing fuel suppliers?

A2. This contract is separate from each agency's routine fuel procurement and is intended solely for emergency use. Therefore, as stated in Question 1, it will not impact or replace an agency's existing day-to-day fuel contracts.

Q3. If awarded, would we be invoicing MWD of OC? Or invoicing directly to the agency we deliver to?

A3. Invoices related to fuel supplied under this contract would be submitted directly to MWDOC for payment.
